DRIVE SOLUTIONS FOR SEWAGE PLANTS

NORD DRIVE SOLUTIONS FOR SEWAGE PLANTS

EFFICIENT, RELIABLE & PROVEN DRIVE SOLUTIONS FOR SEWAGE PLANTS

NORD DRIVESYSTEMS is one of the world's leading drive technology companies and provides solutions used in sewage plants all over the world.

NORD provides:

- Extensive knowledge of applications and technical support
- Complete drive solutions from a single source
- Strong global presence and service
- Thousands of installed drives in the sewage industry throughout the world
- Wide range of products with high quality standards
- Great reliability, economy and service life
- Recognised product quality compliant with international standards

Efficient

NORD drive solutions are environmentally friendly and help minimise CO₂ emissions.

- Extremely efficient helical, parallel shaft and bevel gear units reach efficiencies up to 97%.
- NORD motors meet the latest international energy requirements.
- NORD frequency inverters ensure efficient operation, improved process control, and optimised motor performance.
- Easy to service and maintain, NORD drives reduce standstill times and thus contribute to an increased efficiency and availability of the entire system.

Reliable

It is vital to prevent breakdowns in sewage systems. For this reason, reliability is our main focus when developing drive solutions. All of our system components are precisely matched to each other and ensure smooth operation.

- Autovent ensures a leak free operation.
- Biodegradable oils are available.
- Precisely machined gear wheels
- The gear units are extraordinarily robust, run very quietly and have a particularly long service life.
- NORD inverters electronically protect the drive system and can visualise the operating data.

Tried-and-tested

- We offer you various possibilities for reinforcing the output shafts.
- Increased bearing spacing is available as an option to reduce loads on the bearing, so that service life is increased.
- Use of corrosion-resistant shaft material.

With its expertise for drive solutions in the sewage industry, NORD creates economical applications that meet all current and future requirements.

NORD supports you with:

DESIGN

- myNORD
- Reduced number of variants
- Project design/optimisation
- Drive system design
- Application solutions
- Green solutions
- CAD drawings

COMMISSIONING

- Plug-and-Play
- Support
- Training
- Documentation
- Smart commissioning

SERVICE

- Predictive maintenance (PLC function)
- Spare parts, express shipping
- Global presence
- 24/7 support

With subsidiaries and sales partners in 98 countries on 5 continents, NORD is your worldwide project partner.

NORD DRIVE SOLUTIONS FOR SEWAGE PLANTS

Helical gear units (Catalogue G1000)

- ✓ Foot or flange-mounted
- ✓ Long life, low maintenance
- ✓ Optimum sealing
- ✓ Unicase housing

Power	0.12 – 160 kW
Torque	10 – 26,000 Nm
Ratio	1.35:1 – 14,340.31:1

Parallel shaft gear units (Catalogue G1000)

- ✓ Foot mounted, flange mounted or hollow shaft mounted
- ✓ Hollow or solid shaft
- ✓ Compact design
- ✓ Unicase housing

Power	0.12 – 200 kW
Torque	110 – 100,000 Nm
Ratio	4.03:1 – 6,616.79:1

Bevel gear units (Catalogue G1000)

- ✓ High axial torques
- ✓ High axial and radial loads
- ✓ Long life, low maintenance
- ✓ Unicase housing

Power	0.12 – 200 kW
Torque	180 – 50,000 Nm
Ratio	8.04:1 - 13,432.68:1

Industrial gear units (Catalogue G1050)

- ✓ Parallel axis and right-angled gear units
- ✓ High axial precision
- ✓ Long life, low maintenance
- ✓ Unicase housing

Power	2.2 – 3,000 kW
Torque	15,000 – 250,000 Nm
Ratio	5.54:1 - 30,000:1

VL bearings

VL II reinforced drive shaft bearings

- ✓ Large bearing spacing + reinforced bearings = maximum radial and axial load capacity
- ✓ Longer service life

VL III DRYWELL

- ✓ Additional oil drip plate
- ✓ Oil leak detector or oil sensor

VL IV TRUE DRYWELL

Prevents the risk of leakage with downward-facing output shafts

- ✓ No rubbing seals below the oil level
- ✓ Available for bevel gear and parallel shaft gear units
- ✓ Hollow shaft version with shrink disc, optionally with mit push-in shaft

Overload protection

- ✓ Safety coupling installed between motor and gear unit, alternatively between 2 gear units
- ✓ IEC/NEMA connection dimensions
- ✓ Backlash-free torque transfer
- ✓ Simple torque setting
- ✓ Integrated sensor
- ✓ Protected in housing

Option: Various sealing systems + shaft materials

Double shaft sealing rings

- ✓ Optimum sealing
- ✓ Long life Gasket
- ✓ Clean gear oil

FKM Material

- ✓ Resistant to chemicals
- ✓ High temperatures

Labyrinth seals

- ✓ Re-greaseable and low maintenance or non-re-greaseable versions
- ✓ Protects against splashed water and dirt

Mechanical seal

- ✓ For contact with aggressive and contaminated liquids
- ✓ For use with underwater drive units

Sealing system prevents leakage with downward-facing output shafts

- ✓ TRUE DRYWELL

Rust-proof shafts

Outdoor motor installation

IP55 protection class as standard

- ✓ Motor with shaft sealing ring on the B side
- ✓ Electrolytically galvanized fan cover
- ✓ Brake IP55 with stainless rotor disc and brake drive dog made from stainless material
- ✓ Special paint (optional)
- ✓ Stainless friction plates for brakes (optional)
- ✓ Stainless type plate (optional)
- ✓ Stainless fastening screws (optional)

AS66 option

- ✓ IP66 motor with shaft sealing ring on the B side
- ✓ Electrolytically galvanized fan cover
- ✓ Encapsulated terminal box
- ✓ Stainless type plate
- ✓ Ball bearing in 2 RS version with sealing discs
- ✓ IP66 brake
