

MAXXDRIVE™ INDUSTRIAL GEAR UNITS SAFOMI-IEC FOR MIXERS

Excellent operating reliability

Compact and simple design

Reduced maintenance

SEALLESS ADAPTER FOR MIXERS (SAFOMI)

The compact combination of MAXXDRIVE™ industrial gear units and the SAFOMI-IEC adapter is optimally suited for mixers. Wearing parts and attached components can be reduced, because the SAFOMI-IEC adapter provides an integrated oil expansion volume. This results in greater operational reliability and less maintenance.

Fewer wearing parts

- No shaft sealing ring required between the gear unit and the IEC adapter*

Fewer attached components

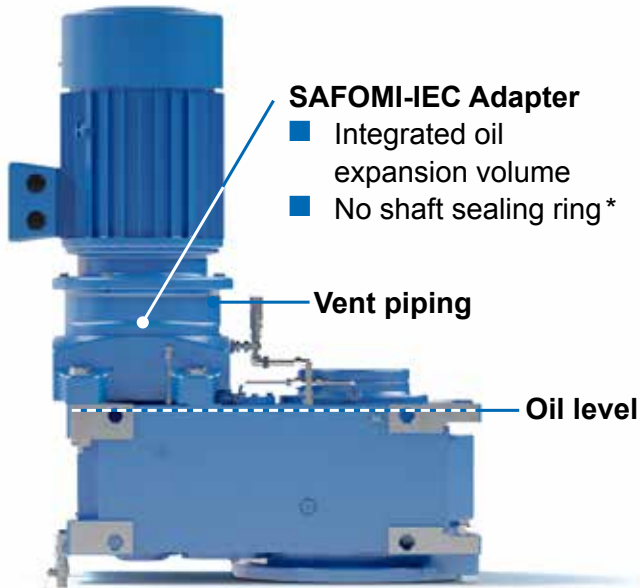

- Reduced oil level, no additional oil tank necessary
- Less installation space

* In combination with the SAFOMI-IEC-Adapter using an oil-tight motor is mandatory.

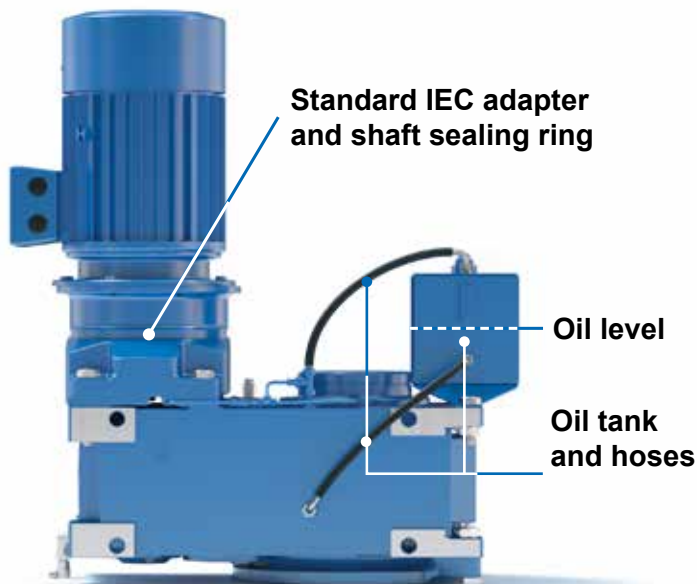

CONVERSION INSTRUCTIONS

SAFOMI-IEC ADAPTER

Version comparison

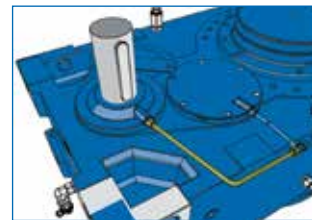

*In combination with the SAFOMI-IEC-Adapter using an oil-tight motor is mandatory.

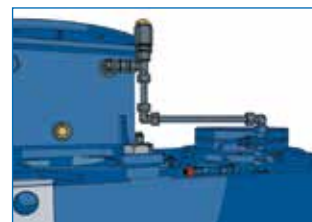

Overview of conversion steps

- 1 Drain off the oil
- 2 Remove the motor, IEC adapter, hoses and tank

- 3 Remove the piping and bearing cover

- 4 Install the SAFOMI-IEC adapter
- 5 Install the vent piping

- 6 Install the dipstick

NORD DRIVESYSTEMS Group

- Family business from Bargteheide near Hamburg with 4,000 employees
- Drive solutions for more than 100 branches of industry
- 7 Production locations worldwide
